REVIEW OF MARKETS

FINANCIAL AND COMMERCIAL

Stocks, Money, Exchange, Bonds, Grain, Cotton, Provisions, Etc.

New York, March 27.—The stock market continued very active and varied to-day, but there was an appreciable check to the upward movement of prices and a distinct falling off in the volume of the demand. The disposition to realize made itself felt in additional stocks. As a consequence the Uonal stocks. As a consequence the market came to that condition during the day which the professionat operators called tired. Its absorptive power was impaired, and the weight of profitaking proyed too much for many stocks which have been most prominent in the recent upward movement. This was conspicuously so of the Southern group of trunk lines, including Pennsylvania, Norfolk and Western and Balmore and Ohio. The stocks of the latter company fluctuated widely all day and were under very palpable manipulation. The common and the preferred stocks were again ostentatiously brought to a parity in the late dealings. The purpose of the manocuvre was evident from the suggestion set affoat that if the Baltimore and Ohio common without paying a dividend could cross the preferred stock, other common stocks in the same situation might do likewise. The Pacific stocks had to absorb a large amount of realizing, and the Southern and Southwestern groups were affected by the same cause. The bituminous coal roads also came to a halt. Other points of strength developed in the list, and the net changes show a large proportion of gains. The general tone of the market, however, was by no means so strong as yesterday, and the transactions were on a smaller scale. The coalers, the high-priced industrials, the iron and steel stocks and local transactions were on a smaller scale. The coalers, the high-priced industrials, the iron and steel stocks and local transactions all showed evidence of strength, and there were some conspicuous advances in stocks not usually traded in to any extent. It would be difficult to assign a cause in any news of the day for the check to the advance, but speculative sentiment accorded more attention to unfavorable possibilities, even of a contingent nature.

The banks are gaining cash on subtreasury operations, and the interior continues to remit to New York in payment of loans incurred by the purchase of government's revenue continues so largely in excess of expenditures. Also the transport Summer sailed

its buying.

The bond market was not so active

NEW YORK COTTON MARKET.

New York, March 27.—The cotton market opened quiet and firm, unchanged to 3 points higher, with shorts the best buyers. Except for some Wall street and Liverpool buying early in the session, the demand from this class of traders was the feature of the business. General speculation, however, improved a little. Following the opening call the market continued to rally, but the improvement was slow until the afternoon, when the summer months became comparatively active and led the way to higher prices for the general list. At best the advance was a matter of 70/15 points. Speculation was not at all aggressive, many traders being intimidated by fears of manipulation, invited by the statistical position. There was considerable buying at times for Liverpool and Wall street account, the latter partly owing to backward preparations for planting on account of unpropitious weather. News in general was so conflicting that the market had no decided trend. The close was steady at a net advance of 60/15 points.
